History of Ayurveda

Ayurveda is attributed to Dhanvantari, the physician to the gods in Hindu mythology, who received it from Brahma. Its earliest concepts were set out in the portion of the Vedas known as the Atharvaveda (c. 2nd millennium BCE). The period of Vedic medicine lasted until about 800 BCE. The Vedas are rich in magical practices for the treatment of diseases and in charms for the expulsion of the demons traditionally supposed to cause diseases. The chief conditions mentioned are fever (takman), cough, consumption, diarrhea, dropsy (generalized edema), abscesses, seizures, tumours, and skin diseases (including leprosy). The herbs recommended for treatment are numerous. The golden age of Indian medicine, from 800 BCE until about 1000 CE, was marked especially by the production of the medical treatises known as the Caraka-samhita and Susruta-samhita, attributed respectively to Caraka, a physician, and Susruta, a surgeon. Estimates place the Caraka-samhita in its present form as dating from the 1st
